

A lifetime of good health for your pet is not as simple as a once a year visit to your local Veterinary Hospital for vaccines and a yearly physical exam.

Each pet's health will depend on several factors:

- Breed
- Size
- Age
- Environment

With that being said, in this brochure you will find 3 life stages of recommendations.

It is our honor to provide your pet the very best in veterinary healthcare.

We care about your pet's health

Our mission is to provide the highest quality of veterinary care for your pet and superior client service. We look forward to being your veterinary health care provider.

- Distemper/Parvo Vaccine
- Continue Heartworm and Flea Preventative
- Discuss spay/neuter

5-6 Months _____

- Spay or Neuter
- Presurgical Blood work
- Continue Heartworm and Flea Preventative

Seventy-five percent of pets over the age of three have dental disease. Dogs and cats are not supposed to have bad breath. Dental plaque, oral diseases, and other conditions can cause bad breath. Brushing your pet's teeth and having regular dental cleanings are beneficial for your pet's health. Advanced dental disease can be painful to your pet and costly to treat.

1 to 6 Years _____

- Annual Wellness Exam
- Weight _____
- Distemper/Parvo Vaccine—3 Year
- Rabies—3 Year
- Annual Leptospirosis Vaccine
- Bordetella—Kennel Cough
- Intestinal parasite exam
- Heartworm/blood parasite test
- Diet Recommendations
- Dental exam

If your dog just happens to be the outdoors type, and likes a walk in the woods, chasing after birds, or just camping with the family, then you will want to ask the doctor about having him/her vaccinated for Lyme disease, and/or the Rattlesnake Vaccine. We will be happy to answer any questions you may have in regards to these vaccines.

“Senior at Seven”

Pet's age much faster than people do. Most pets are considered seniors at seven years of age. Dogs should visit a veterinarian once a year for the first six years of their lives, then twice a year after the age of seven.

7 Years and beyond _____

- Twice a year Wellness Exam
- Weight _____
- Nutritional Assessment
- Behavior Assessment
- Rabies—3 Year
- Distemper/Parvo Vaccine—3 Year
- Bordetella (Kennel Cough)
- Annual Leptospirosis
- Dental Exam
- Intestinal Parasite Exam
- Heartworm and Flea Preventative

Senior Wellness Tests

- Chemistry Panel w/ Thyroid
- Complete Blood Count
- Radiographs
- Urinalysis
- Eye Pressure Measurement
- Blood Pressure Measurement
